# ENVIRONMENTAL HEALTH SEMINAR

---

## Population Displacement following Extreme Weather Events

**SPEAKER:**

**Monica Onyango, RN, PhD, MPH**

*Clinical Assistant Professor of International Health*

Extreme weather events are increasingly common and more devastating, particularly in developing countries where response systems are not well developed or non-existent. Many populations affected by disasters survive because of assistance from local and international humanitarian agencies.

This session will discuss practical ways to respond and intervene.

**FRIDAY, NOVEMBER 9**

**Noon – 1 pm**

**BU Medical School, Room L210**

**Boston University** School of Public Health  
Department of Environmental Health
