Dear editor

We thank Luthfiyah S, Triwiyanto T, Ismath M for their interest in our study and their letter recommending areas of further exploration to strengthen the study's implications.

We acknowledge their suggestions of further research to build upon our findings, which we genuinely believe could add additional value and are worth exploring.

Disclosure

Sarah Gary reports being an employee of Clario. The authors report no other conflicts of interest in this communication.

Dove Medical Press encourages responsible, free and frank academic debate. The content of the Patient Preference and Adherence 'letters to the editor' section does not necessarily represent the views of Dove Medical Press, its officers, agents, employees, related entities or the Patient Preference and Adherence editors. Publish your work in this journal

Patient Preference and Adherence is an international, peer-reviewed, open access journal that focusing on the growing importance of patient preference and adherence throughout the therapeutic continuum. Patient satisfaction, acceptability, quality of life, compliance, persistence and their role in developing new therapeutic modalities and compounds to optimize clinical outcomes for existing disease states are major areas of interest for the journal. This journal has been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
