

**Population Pharmacokinetic of Epidural Sufentanil in Labouring Women: A Multicentric, Prospective, Observational Study [Corrigendum]**

Nie Y, Sun X, Cao R, et al. *Drug Des Devel Ther.* 2025(19): 971-980.

Upon receiving the letter to the editor addressing the dosage error, we hereby correct the dosage from 3 µg/mL sufentanil mixture to 0.3 µg/mL sufentanil mixture for accuracy.

In “Materials and Methods”, “Anesthesia Management” subsection on page 972, second sentence should read from “After placing an indwelling epidural catheter as a routine procedure, the mother was given an epidural injection of 0.1% ropivacaine and 3µg/mL sufentanil mixture”. To “After placing an indwelling epidural catheter as a routine procedure, the mother was given an epidural injection of 0.1% ropivacaine and 0.3µg/mL sufentanil mixture”.

The authors apologize for this oversight.

Drug Design, Development and Therapy

Publish your work in this journal

Drug Design, Development and Therapy is an international, peer-reviewed open-access journal that spans the spectrum of drug design and development through to clinical applications. Clinical outcomes, patient safety, and programs for the development and effective, safe, and sustained use of medicines are a feature of the journal, which has also been accepted for indexing on PubMed Central. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
