

LncRNA PVT1 promotes proliferation, invasion and epithelial–mesenchymal transition of renal cell carcinoma cells through downregulation of miR-16-5p [Corrigendum]

Ren Y, Huang W, Weng G, Cui P, Liang H, Li Y. *OncoTargets Ther.* 2019;12:2563–2575.

corrigendum. This correction of images has no impact to the findings of the study and the authors apologize for this error.

Following a review of the data post-publication, the authors found the incorrect images were used for Figure 2C and D. The correct images Figure 2C and D are shown in this

On page 2567, Figure 2C and D should be presented as follows:

OncoTargets and Therapy**Dovepress****Publish your work in this journal**

OncoTargets and Therapy is an international, peer-reviewed, open access journal focusing on the pathological basis of all cancers, potential targets for therapy and treatment protocols employed to improve the management of cancer patients. The journal also focuses on the impact of management programs and new therapeutic

agents and protocols on patient perspectives such as quality of life, adherence and satisfaction. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
