

Lipid-Polymer Hybrid Nanoparticles for Controlled Delivery of Hydrophilic and Lipophilic Doxorubicin for Breast Cancer Therapy [Erratum]

Tahir N, Madni A, Correia A, et al. *Int J Nanomed.* 2019;14:4961–4974.

Following feedback from a reader, we found the incorrect artwork was presented for [Figure 3](#).

On page 4967, Figure 3 artwork is incorrect, Figure 4 artwork was mistakenly added by the Editorial staff during the publication process. The correct figure is:

Figure 3 FTIR spectra of PLGA (A), lecithin (B), DSPE-PEG 2000 (C), Luterol (D), DOX (E) blank formulation (F), and DOX loaded LPHNPS (G).

Abbreviations: DOX, doxorubicin; DSPE-PEG 2000, 1,2-distearoyl-Sn-glycero-3-phosphoethanolamine-N-[methoxy (polyethylene glycol)]-2000; LPHNPs, lipid polymer hybrid nanoparticles; PLGA, poly (D, L-lactide-co-glicolide).

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine,

Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
