

RETRACTION

Asymmetry of Subthalamic Neuronal Firing Rate and Oscillatory Characteristics in Parkinson's Disease [Retraction]

Zhao XM, Zhuang P, Li Y, et al. *Neuropsychiatr Dis Treat*. 2020;16:313–323.

At the request of the authors, the Editor-in-Chief and Publisher of *Neuropsychiatric Disease and Treatment* wish to retract the published article.

Following publication of the article we were notified by Professor Ping Zhuang, who was listed as the corresponding author, that he was not an author and had no knowledge of the publication. Prof. Zhuang raised the matter with the Department of Education at Xuanwu Hospital, Capital Medical University and an investigation was carried out, headed by the Department Chair. The investigation found the first author, Xue-Min Zhao, had created a fake submission account and email address for Prof.

Zhuang and submitted the article without the consent or knowledge of her advisor. The investigation advised the article should be retracted and editor has agreed with this recommendation. The authors have supported this decision and wish to apologise for this transgression.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

Neuropsychiatric Disease and Treatment is an international, peer-reviewed journal of clinical therapeutics and pharmacology focusing on concise rapid reporting of clinical or pre-clinical studies on a range of neuropsychiatric and neurological disorders. This journal is indexed on PubMed Central, the 'PsycINFO' database and CAS, and

is the official journal of The International Neuropsychiatric Association (INA). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
