

Patient Selection for Bronchoscopic Lung Volume Reduction [Corrigendum]

Welling JBA, Hartman JE, Augustijn SWS, et al. *Int J Chron Obstruct Pulmon Dis*. 2020;15:871–881.

number of patients at risk below the survival graph for the “Invited” and “Not Invited” category are transposed.

The authors have advised there are errors in Figure 3 on page 878. Figure 3A, the first set of numbers listed for the number of patients at risk below the survival graph are transposed. Figure 3B, all of the numbers listed for the

The correct Figure 3 is shown below. These errors do not affect the results of the paper.

The authors apologize for these errors.

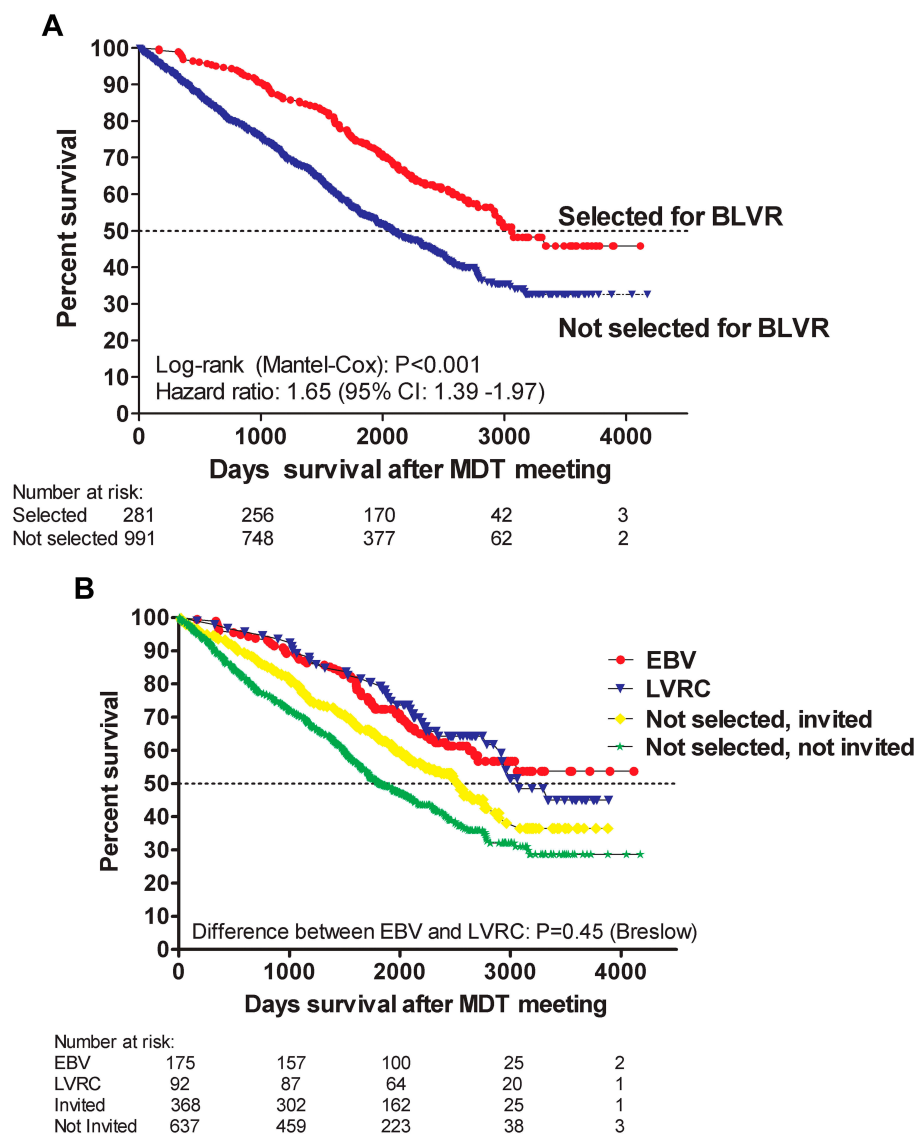

Figure 3 Kaplan-Meier plots of survival. (A) Survival of the patients that were selected for treatment and the patients that were not selected for treatment. (B) Survival of the patients that were selected for EBV, selected for LVRC, invited to our hospital for consultation but not selected for BLVR, not selected for BLVR and not invited to our hospital for consultation. **Abbreviations:** EBV, endobronchial valve treatment; LVRC, lung volume reduction coil treatment; BLVR, bronchoscopic lung volume reduction; MDT, multidisciplinary team meeting.

International Journal of Chronic Obstructive Pulmonary Disease**Dovepress****Publish your work in this journal**

The International Journal of COPD is an international, peer-reviewed journal of therapeutics and pharmacology focusing on concise rapid reporting of clinical studies and reviews in COPD. Special focus is given to the pathophysiological processes underlying the disease, intervention programs, patient focused education, and self management

protocols. This journal is indexed on PubMed Central, MedLine and CAS. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
