CORRIGENDUM

A Cleverly Designed Novel Lipid Nanosystem: Targeted Retention, Controlled Visual Drug Release, and Cascade Amplification Therapy for Mammary Carcinoma in vitro [Corrigendum]

Zhao XZ, Zhang W, Cao Y, et al. *Int J Nanomedicine*. 2020;15:3953–3964.

The authors have advised due to an error that occurred inadvertently at the time of figure assembly, Figure 2M on page 3956 is incorrect.

The correct Figure 2 is shown below.

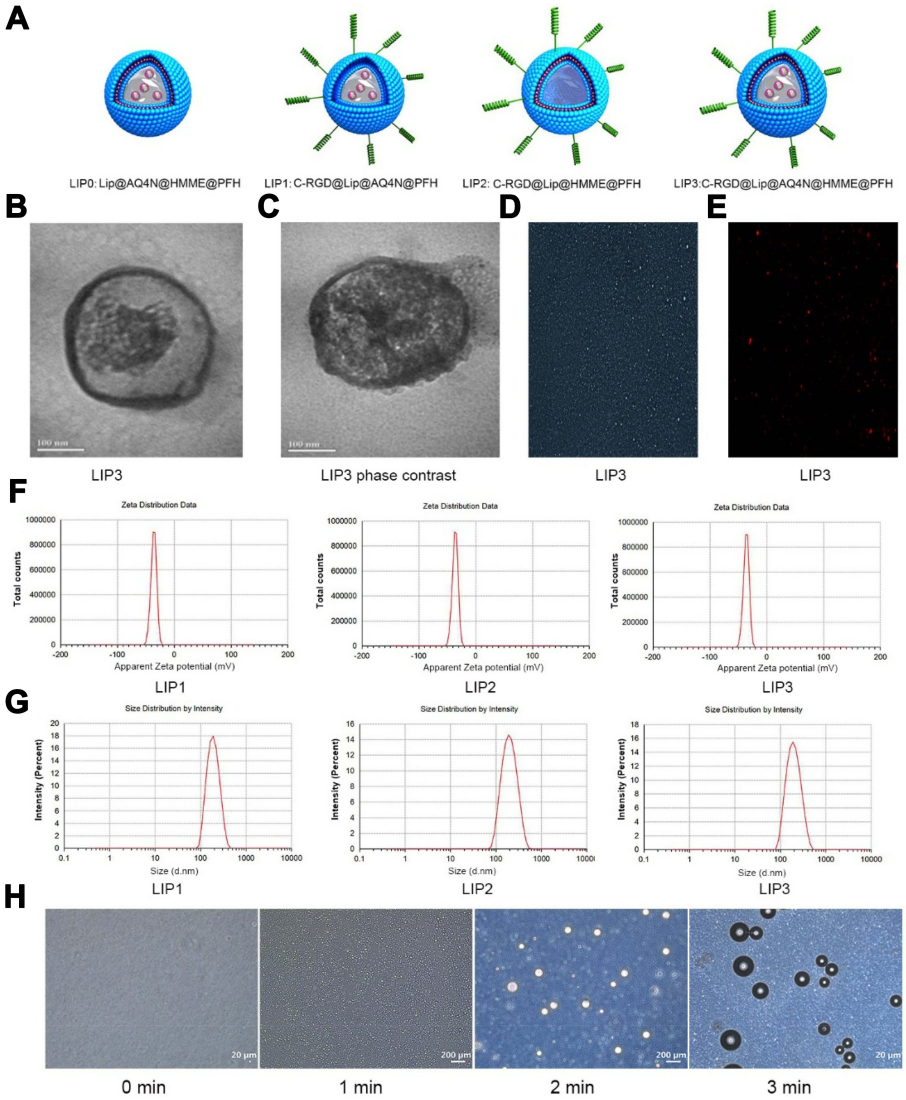

Figure 2 Continue

The authors have also advised there is an error in Figure 3 on page 3960. The concentration units in part B show "mg" they should read "mg/ml".

The correct Figure 3 is shown below.

The authors apologize for these errors.

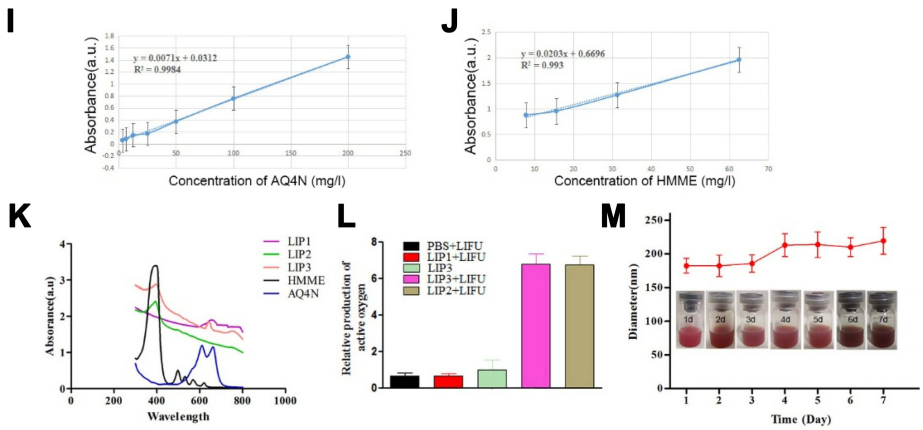

Figure 2 General physicochemical properties of LIP3. (**A**) Structure illustration of LIP0, LIP1, LIP2, and LIP3. (**B**) TEM of LIP3. (**C**) Phasing sign TEM of LIP3. (**D**) Light microscopy image of LIP3. (**E**) Fluorescence microscope image of Dil-stained LIP3 NPs (×400). (**F**) Zeta potential of LIP1, LIP2, and LIP3. (**G**) Size of LIP1, LIP2, and LIP3. (**H**) LIP3 light microscopy image of the sonogenic phase transition (× 400). (**I**) Correlation between concentration of AQ4N and absorbance. (**J**) Correlation between concentration of HMME and absorbance. (**K**) UV-vis–NIR absorbance spectra of LIP1, LIP2, and LIP3 and free HMME, AQ4N. (**L**) Relative production of active oxygen of LIP3. (**M**) LIP3 size distribution with prolonged time duration. Insert: digital photos of the LIP3 NPs dispersed in PBS (2.5 mg/mL).

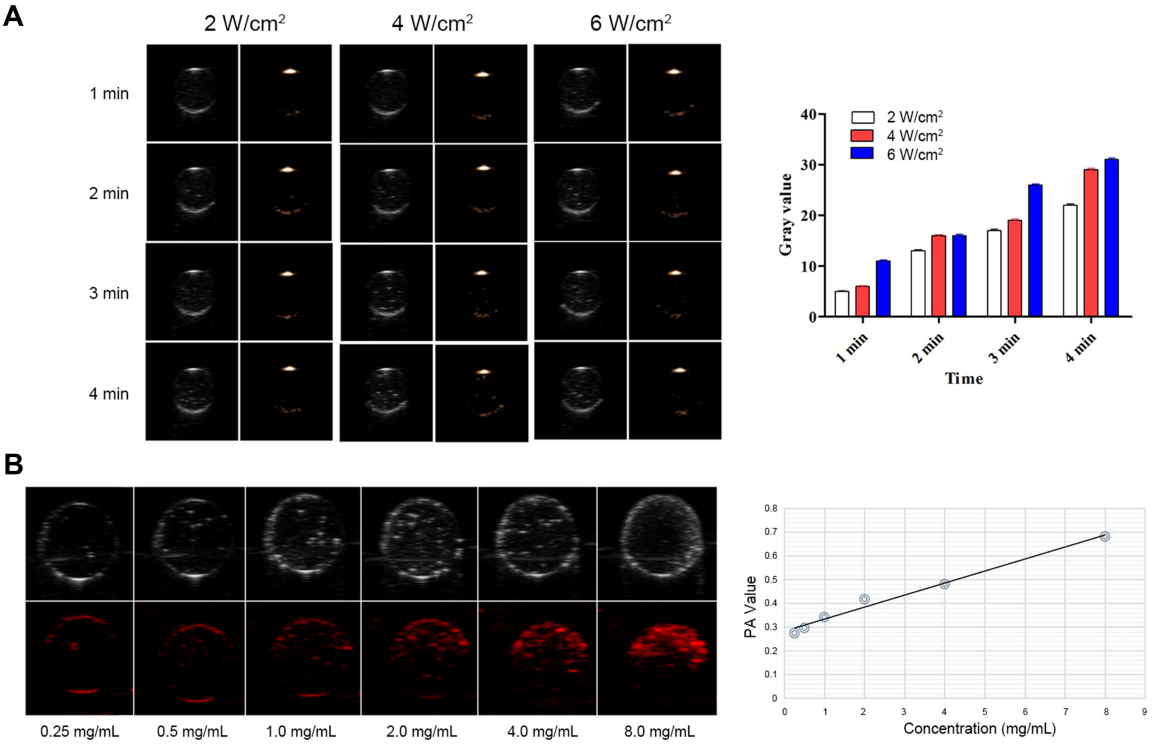

Figure 3 LIP3 bimodal imagining in vitro. (**A**) LIP3 CEUS imaging and grey value histogram of different groups in vitro. (**B**) LIP3 PA imaging and PA value scatter diagram with different concentrations in vitro.
