

microRNA-548b Suppresses Aggressive Phenotypes of Hepatocellular Carcinoma by Directly Targeting High-Mobility Group Box 1 mRNA [Retraction]

Yun Z, Meng F, Jiang P, Yue M, Li S. *Cancer Manag Res.* 2019;11:5821–5834.

images in Figure 8A from Song et al, 2019 (<https://doi.org/10.2147/OTT.S201282>).

The Editor and Publisher of *Cancer Management and Research* wish to retract the published article. Concerns were raised over alleged image duplication in Figures 6D and 8A with similar images from unrelated articles, specifically:

- Figure 6D, panel Hep3B 1 appears to have been duplicated with a similar image in Figure 5D from Chen et al, 2019 (<https://doi.org/10.2147/OTT.S192137>).
- Figure 6D, panel SK-HEP-1 6 appears to have been duplicated with a similar image in Figure 6D from Liu et al, 2019 (<https://doi.org/10.3892/ijo.2019.4735>).
- Figure 8A, panels NC mimics 2 and miR-548b mimics 2 appear to have been duplicated with similar

The authors responded to our queries but were unable to provide a satisfactory explanation for the alleged duplication and could not provide satisfactory original data for their study. The Editor advised for the article to be retracted.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

Cancer Management and Research is an international, peer-reviewed open access journal focusing on cancer research and the optimal use of preventative and integrated treatment interventions to achieve improved outcomes, enhanced survival and quality of life for the cancer patient.

The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
