

RETRACTION

Green Synthesis of Silver Nanoparticles Using Extract of Jasminum officinal L. Leaves and Evaluation of Cytotoxic Activity Towards Bladder (5637) and Breast Cancer (MCF-7) Cell Lines [Retraction]

Elhawary S, EL-Hefnawy H, Alzahraa FA, et al. Int J Nanomedicine. 2020;15:9771–9781.

The Editor and Publisher of International Journal of Nanomedicine wish to retract the published article. Concerns were raised regarding the alleged manipulation of data shown in Figure 6, where sections of the X-ray diffraction pattern appear to have been duplicated.

The authors responded to our queries but were unable to provide an adequate explanation for the duplicated pattern nor could they provide the original files or data concerning this part of the study. As the authors were unable to verify the findings from their study the Editor requested for the article to be retracted and the authors were notified of this decision.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as "Retracted".

International Journal of Nanomedicine

Dovepress

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit http:// www.dovepress.com/testimonials.php to read real quotes from published authors.
