

Ammonium Glycyrrhizinate-Loaded Niosomes as a Potential Nanotherapeutic System for Anti-Inflammatory Activity in Murine Models [Retraction]

Marianecchi C, Rinaldi F, Di Marzio L, et al. *Int J Nanomedicine*. 2014;9(1):635–651.

The Editor and Publisher of *International Journal of Nanomedicine* wish to retract the published article. Concerns were raised regarding the alleged duplication of TEM images in Figure 1. Specifically,

- Figure 1A, F1, appears to have been duplicated with the same image for Figure 1C, F3 and Figure 1D, F3AG.

The authors did respond to our queries but were unable to explain how the duplication of images occurred, nor were they able to provide the original TEM images from the reported study. The decision was made to retract the article and the authors were notified of this.

Our decision-making was informed by our policy on publishing ethics and integrity and the COPE guidelines on retraction.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
