

Combining Multiple Indices of Diffusion Tensor Imaging Can Better Differentiate Patients with Traumatic Brain Injury from Healthy Subjects [Corrigendum]

Abdelrahman HAF, Ubukata S, Ueda K, et al. *Neuropsychiatr Dis Treat*. 2022;18:1801–1814.

On page 1801, Abstract, Results, last sentence, the text “area under the curve of 93 ± 0.09 ” should read “area under the curve of 0.93 ± 0.09 ”.

On page 1803, Imaging Acquisition section, line four, the text “64 non-collinear axis motion-probing gradients” should read “81 non-collinear axis motion-probing gradients”.

On page 1803, Image Processing section, second paragraph, line seven, the text “was then thresholded at an FA value of 0.2” should read “was then thresholded at an FA value of 0.2”.

On page 1803, Image Processing section, second paragraph, line two from the bottom, the text “Voxel-wise maps were thresholded at $p < 0.05$ ” should read “Voxel-wise maps were thresholded at $p < 0.05$ ”.

The authors apologize for any inconvenience caused by these errors and for any confusion that may have arisen as a result. The authors would also like to assure the readers that these corrections do not affect the results or conclusions of the paper and are intended only to improve the accuracy of the methodology and data presentation.

Publish your work in this journal

Neuropsychiatric Disease and Treatment is an international, peer-reviewed journal of clinical therapeutics and pharmacology focusing on concise rapid reporting of clinical or pre-clinical studies on a range of neuropsychiatric and neurological disorders. This journal is indexed on PubMed Central, the ‘PsycINFO’ database and CAS, and is the official journal of The International Neuropsychiatric Association (INA). The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
