

RETRACTION

Inhibition of Circulating Exosomal miRNA-20b-5p Accelerates Diabetic Wound Repair [Retraction]

Chen K, Yu T, Wang X. *Int J Nanomedicine*. 2021;16:371–381.

At the authors request, the Editor and Publisher of the journal *International Journal of Nanomedicine* have retracted the published article.

The corresponding authors informed the journal that approval from the Laboratory Animal Management Committee at Tongji Hospital, Tongji University School of Medicine, was not received prior to performing the animal experiments, despite a statement contrary to this being used in the article. The authors wished to apologize for this oversight and given the situation, the authors no longer have confidence in the normalization of the animal experiment process and corresponding results. To maintain academic standards, the authors requested to retract the article and the Editor and Publisher agreed with this decision.

We have been informed in our decision-making by our editorial policies and COPE guidelines.

The retracted article will remain online to maintain the scholarly record, but it will be digitally watermarked on each page as “Retracted”.

International Journal of Nanomedicine

Dovepress

Publish your work in this journal

The International Journal of Nanomedicine is an international, peer-reviewed journal focusing on the application of nanotechnology in diagnostics, therapeutics, and drug delivery systems throughout the biomedical field. This journal is indexed on PubMed Central, MedLine, CAS, SciSearch®, Current Contents®/Clinical Medicine, Journal Citation Reports/Science Edition, EMBase, Scopus and the Elsevier Bibliographic databases. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
