

Association Between Age and the 28-Day All-Cause Mortality in Tuberculosis Complicated by Sepsis in ICU Patients: A Retrospective Cohort Study [Corrigendum]

Cui K, Mao Y, Feng S, et al. *Infect Drug Resist.* 2024;17:1879–1892.

The authors have advised due to an error at the time of figure assembly, Figure 1 on page 1881 is incorrect. The correct Figure 1 is shown below.

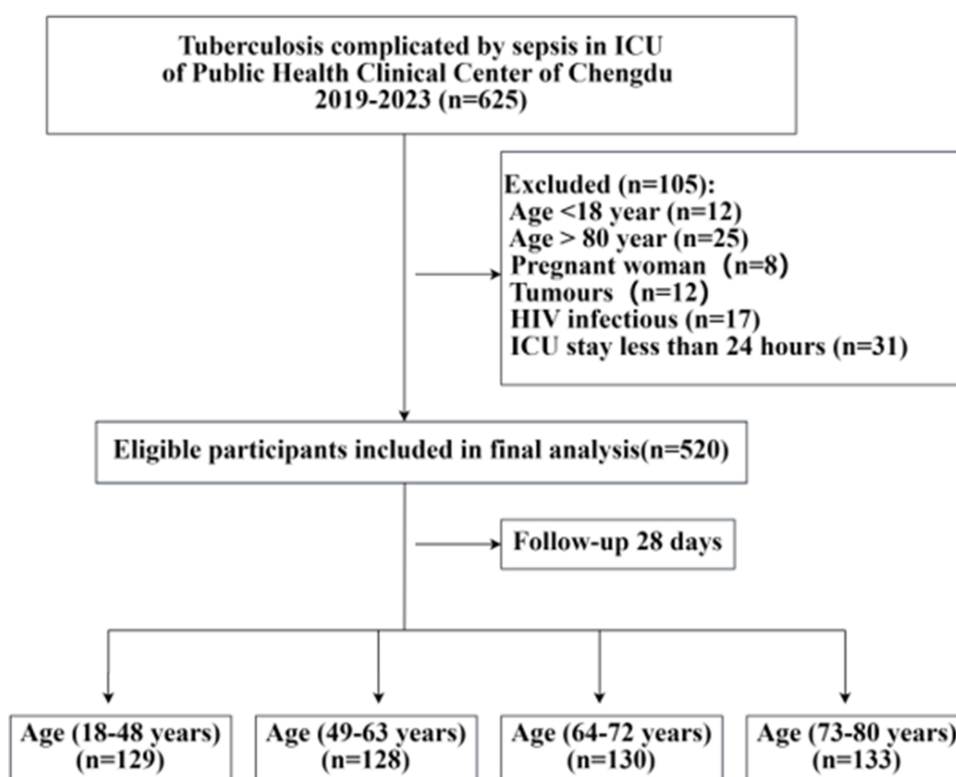

Figure 1 Flow chart of participants included in this analysis.

The authors apologize for this error and advise it does not affect the results of the paper.

Infection and Drug Resistance**Dovepress****Publish your work in this journal**

Infection and Drug Resistance is an international, peer-reviewed open-access journal that focuses on the optimal treatment of infection (bacterial, fungal and viral) and the development and institution of preventive strategies to minimize the development and spread of resistance. The journal is specifically concerned with the epidemiology of antibiotic resistance and the mechanisms of resistance development and diffusion in both hospitals and the community. The manuscript management system is completely online and includes a very quick and fair peer-review system, which is all easy to use. Visit <http://www.dovepress.com/testimonials.php> to read real quotes from published authors.
