

# From idea to award: Planning your first (or next) NIH grant submission

Brett Miller, PhD

# Goal and structure

- Background on the NIH and NICHD
- Understanding the application process
- Opportunities for funding for research, training, and mentorship

# The National Institutes of Health

*The Nation's Steward of Medical, Behavioral, and Social Sciences Research*

“Science in pursuit of fundamental knowledge about the nature and behavior of living systems and the application of that knowledge to extend healthy life and reduce the burdens of illness and disability.”

# National Institutes of Health

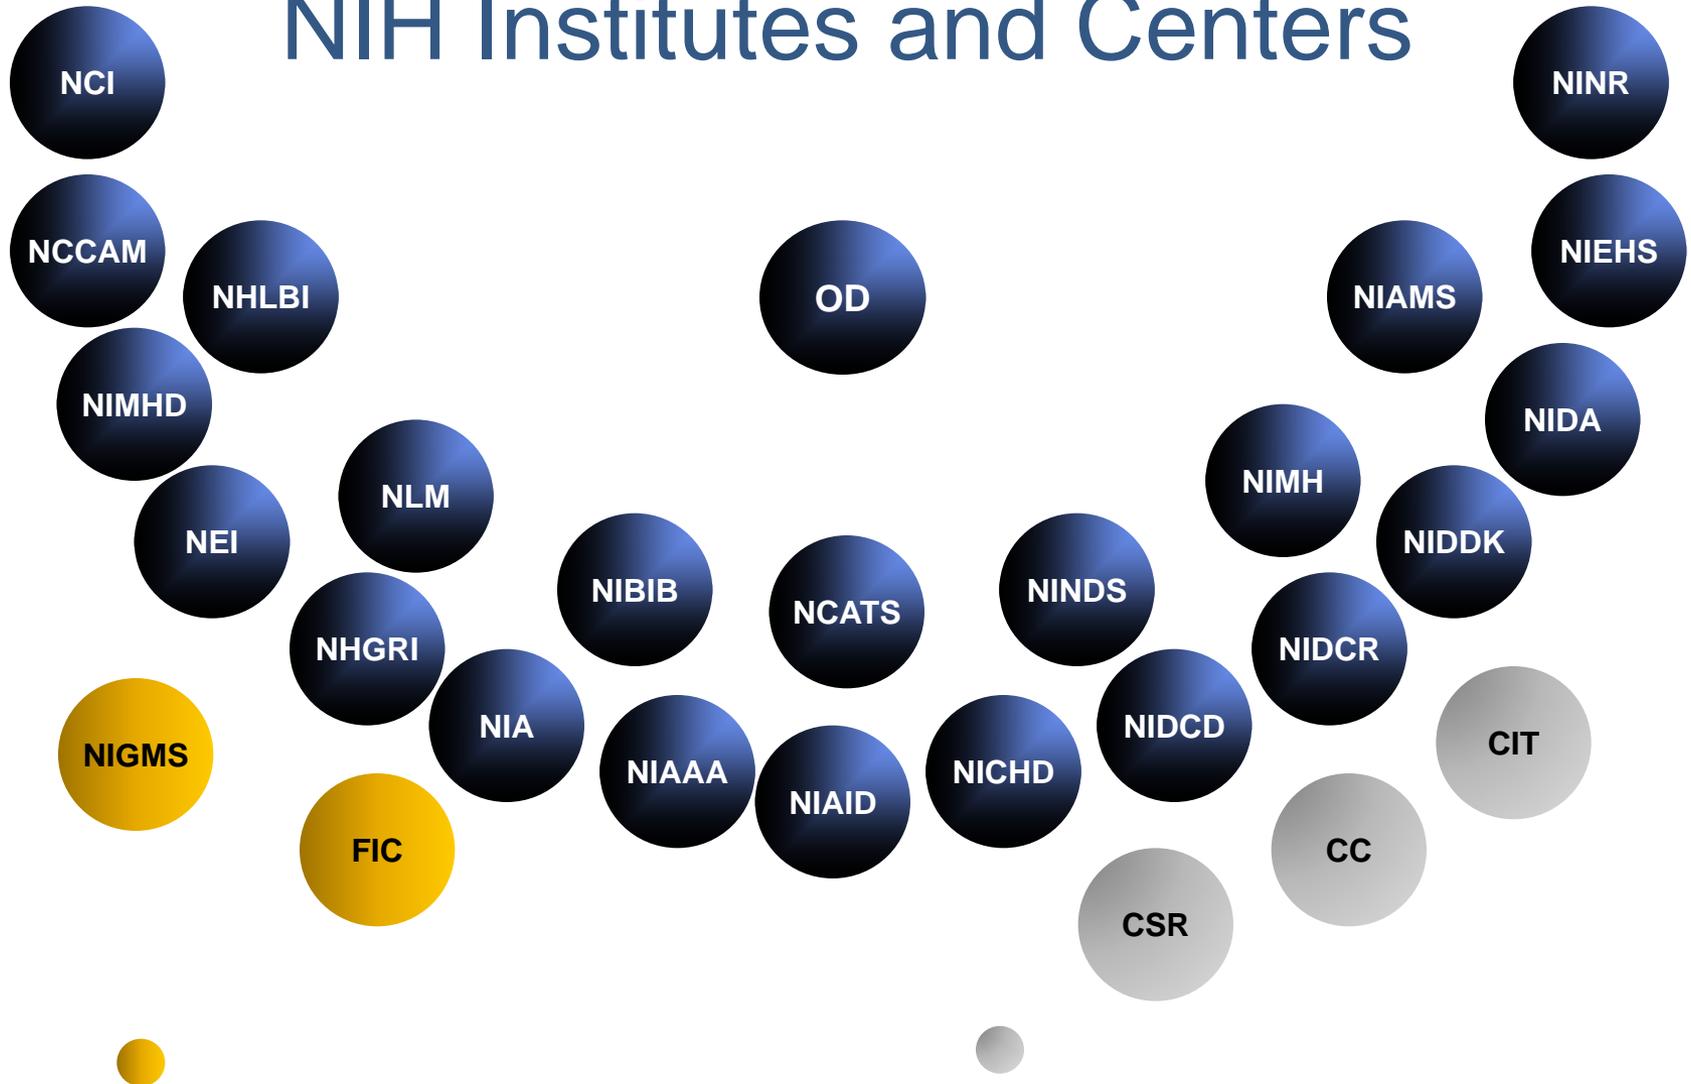

World's largest supporter of biomedical, behavioral, and social science research and training.

~\$30 Billion budget (FY2015)

27 Institutes and Centers

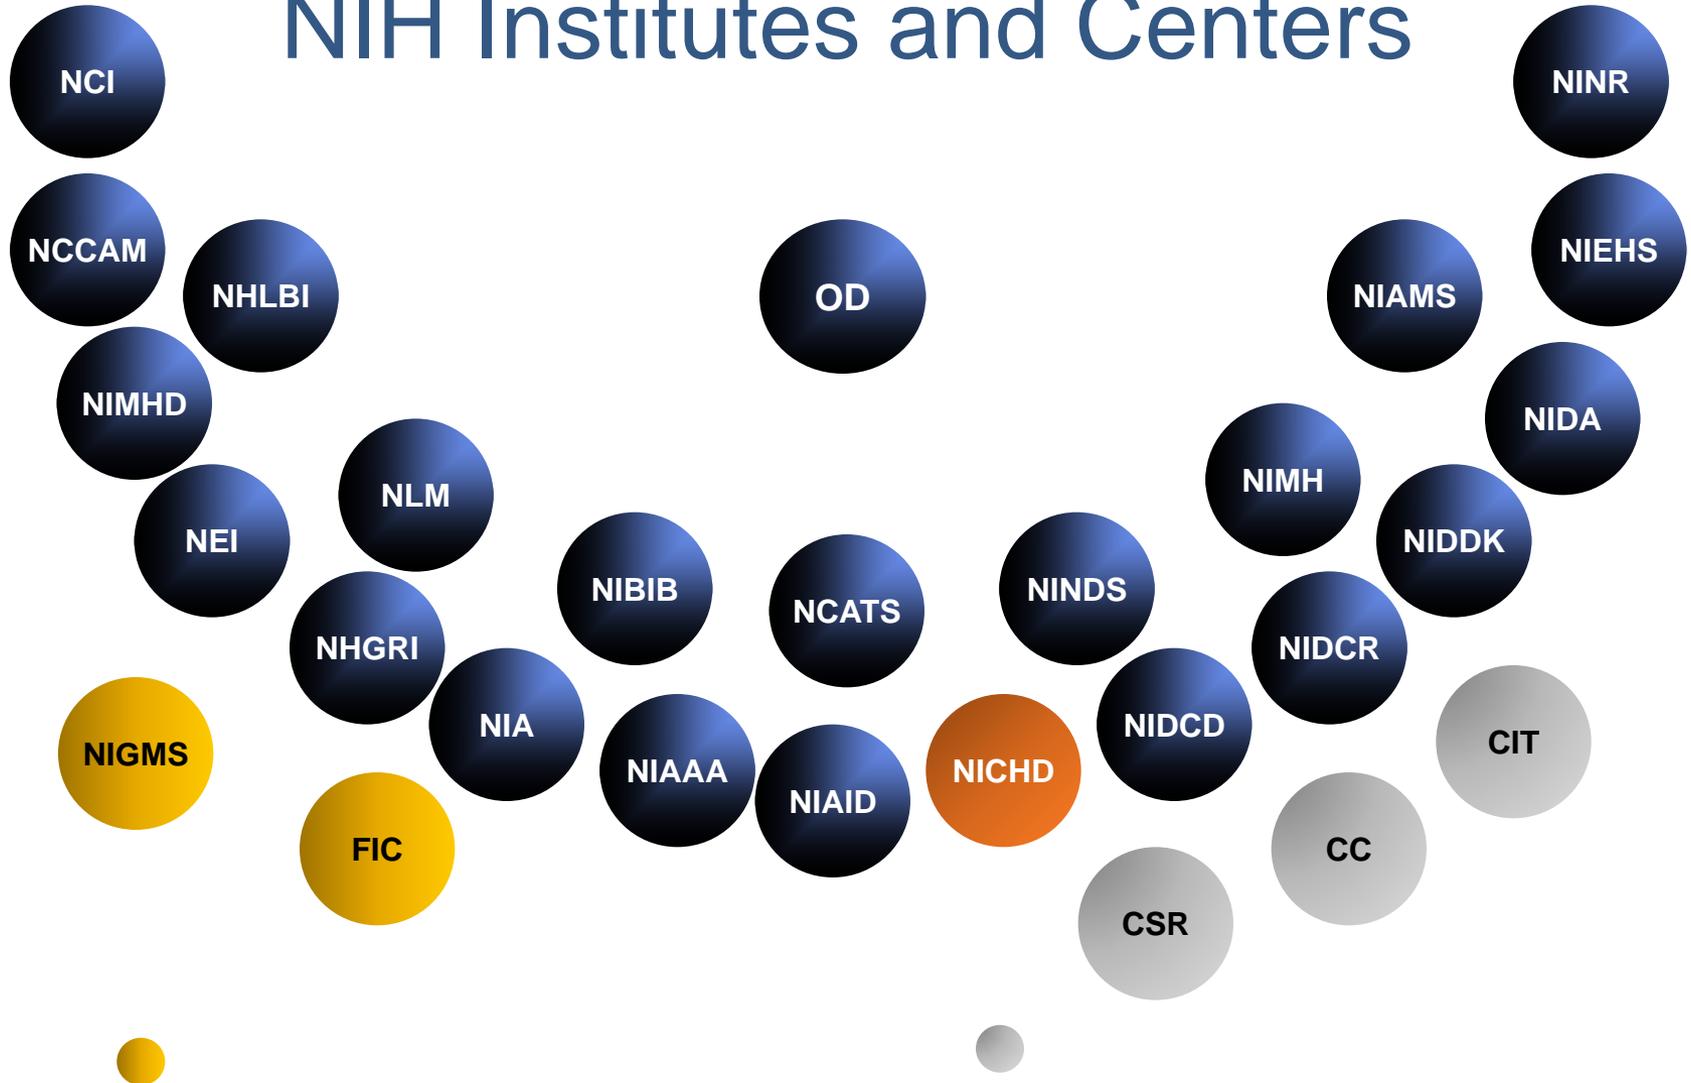

# NIH Institutes and Centers

# NIH Institutes and Centers

# YOU HAVE AN IDEA OR PLAN

---

Now what?

## First: Know your organizational audience

- In contrast to other funders, NIH views these problems through the lens of a public health organization
  - Your application will need to reflect this.
  - **Your mentor and/or program officer can help you with this**
- Pay attention to the different missions of ICs within NIH to help find the right home and ensure fit

# Will NIH Fund My Research?

- Opportunities for funding at NIH are diverse, but you should check with a Program Officer (PO) **before** submitting a grant application
  - This allows you to ensure fit with NIH and a specific program at an IC
  - Recognize that many grant applications are not in response to a specific Request for Applications (RFA) - They are “unsolicited applications”.
  - An NIH Program Officer may direct you to another funding source as appropriate

# Things to consider (ideally) before contacting someone at NIH

- Applicants should consider at least these factors:
  - Career stage (e.g., graduate student, postdoc, Asst. Professor)
  - Publication record --- It's not simply the number of pubs!
  - Pilot data --- type, quality, and how pertinent to your planned project
  - Mentorship needs (if relevant)
  - Rough estimates of the actual costs of doing the necessary training / mentorship or conducting the research
  - Realistic view of timeline
    - It typically at least 9 months from application date to funding (generally 1.5-2 years)

# Why these items for consideration?

- Functionally it is a needs assessment
- Allow for more efficient early communication with program staff
- Generally transferrable to other funding agencies if NIH is not the right home

# HOW DO YOU FIND AN NIH CONTACT?

---

Where to start?

# Program Official

---

- ✓ *An Important Resource for Applicants & Investigators*
- ✓ *Principal liaison between Investigators and the NIH*
- ✓ The most important contact for Scientists

***Call us early ...  
Contact us often!***

# Identifying program officials at NIH

- Common approaches
  - Identify an institute with interests that overlaps with yours
  - Ask colleagues (mentors) for suggested contacts
  - Identify staff from specific program announcements (PA) or program announcements with specific review (PAR)
  - Search RePorter for similar grants and identify PO
  - Reach out to a known NIH contact and ask for assistance in identifying relevant contact
- Note, you want to identify a program official (HSA – health scientist administrator)
  - These individuals are your primary point of contact

# Alternative approach to identifying program contacts at NIH

 Profile Exists  No Profile

**Name:** [GAAB, NADINE](#) 

**Name:** MILLER, BRETT

Not Applicable

**Email:** [Click to view Contact PI / Project Leader email address](#)

**Email:** [Click to view PO email address](#)

**Title:**

1. Search on topic field
2. Identify project of interest and view this project
3. Click on details tab and identify the assigned program official

# Efficient interactions with your program official

- How best to contact a PO?
  - Email is almost always best and we are generally happy to chat as needed
  - Clearly indicate if it is an urgent or time sensitive request
- Initial contact?
  - Introduce yourself and clarify your goal/need
    - I can help you figure out how to meet the goal if you don't know how to proceed
  - Keep the email no more than 2-3 paragraphs
  - Follow-up as needed
- Be assertive, but not pushy
  - We are all busy so response time can vary, but this is your career so you should follow-up as needed

# FUNDING OPPORTUNITIES

---

What options are available to you now?

# Return to your needs assessment

- NIH funding falls into broad groups (examples below)
  - Research projects
  - Program project – multi-project research programs and centers
  - Training grants
  - Mentorship awards
- Contact your Program official – s/he can help confirm your ideas or guide you to alternatives you should consider

# Funding Opportunities

- Advertised through
  - Grants.gov
  - NIH Guide for Grants and Contracts
- Issued by
  - Each IC
  - “Parent” announcements span the breadth of the NIH mission, include many ICs

# Know the terminology; Funding Opportunity Announcements (FOA)

<b>Type of FOA</b>	<b>Description</b>
<b>Program Announcements (PA, PAR, PAS)</b>	<ul style="list-style-type: none"><li>• Highlights areas of focus</li><li>• Usually ongoing (3 yrs)</li><li>• Often use standard receipt dates</li></ul>
<b>Requests for Applications (RFA)</b>	<ul style="list-style-type: none"><li>• Narrowly defined scope</li><li>• Usually single receipt date</li><li>• Set aside funds</li><li>• IC usually convenes review panel</li></ul>
<b>Parent Announcements</b>	<ul style="list-style-type: none"><li>• Type of program announcement</li><li>• Generally span the breadth of NIH mission</li><li>• By activity code (R01, R03, etc)</li><li>• For “investigator initiated” or “unsolicited” research ideas</li></ul>

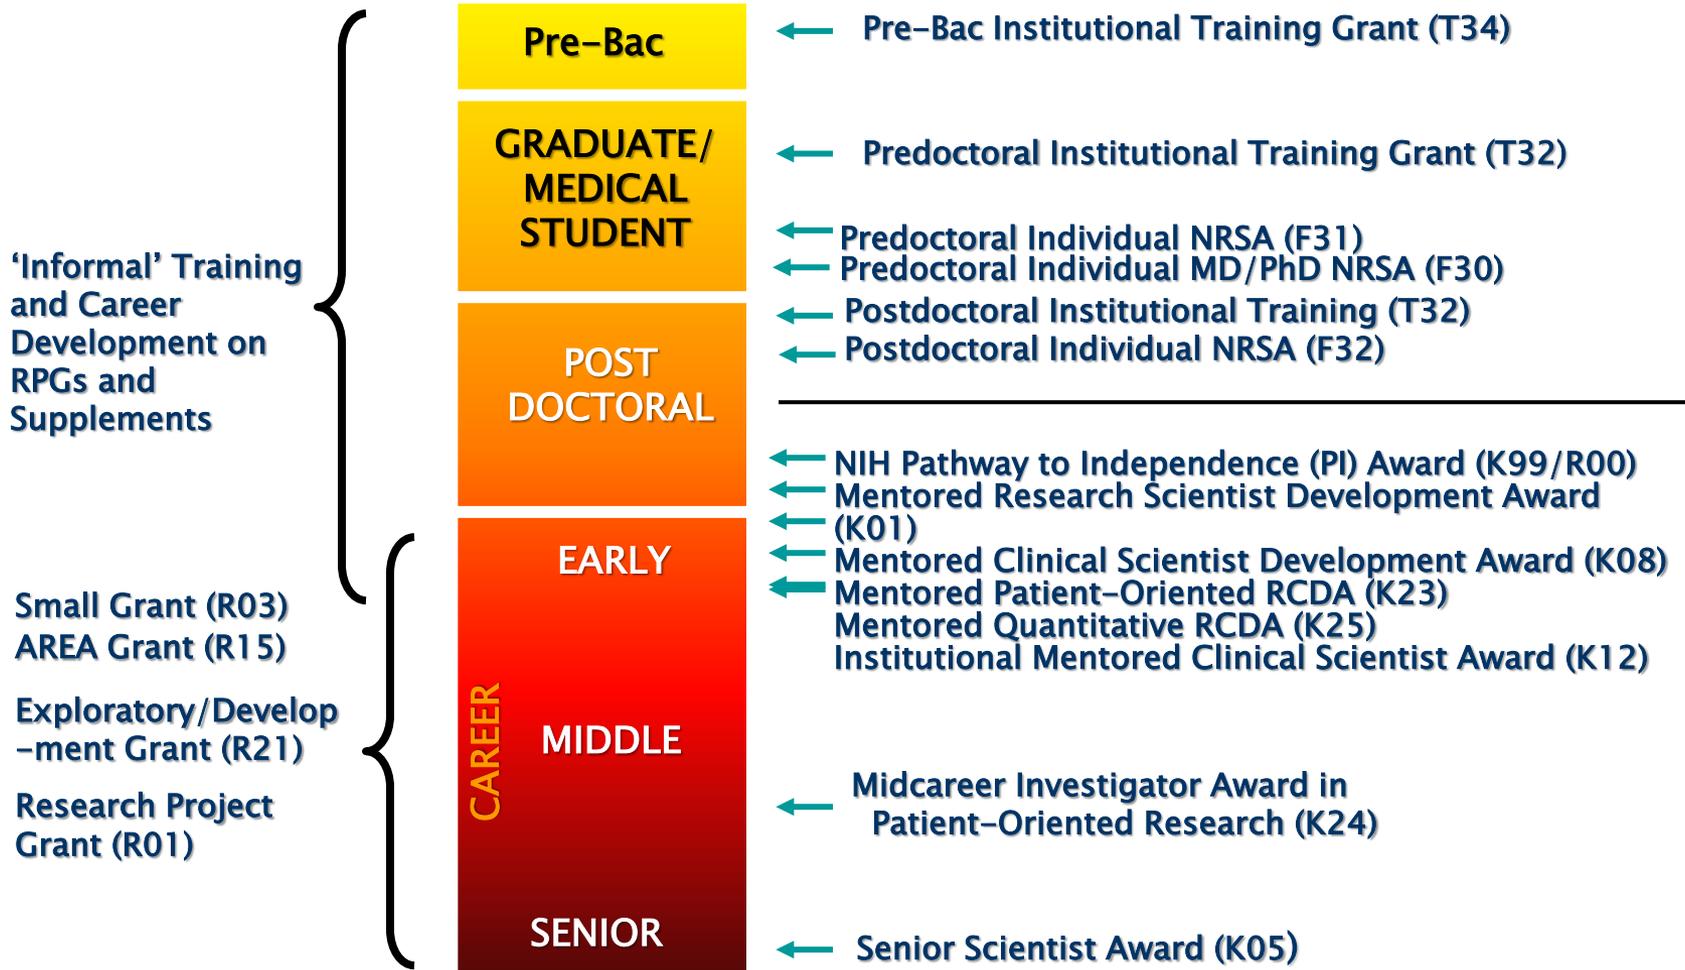

What's the Right Type of Grant for My Idea (and Me)?

# Research Training and Career Development Timeframe

## Research Awards

## Career Stage

## 'Formal' Training/Career Awards

# Grants that build your expertise...

- Fellowships
  - **F31** --- Individual Predoctoral Fellowships
    - 2 types of announcements
      - Promoting diversity and open eligibility
      - Includes funds for stipend, tuition and fees and minimal research expenses
      - Open to all scientific topics relevant to NICHD
      - This is in your name!
  - **F32** – Individual Postdoctoral Fellowships
    - Stipend and funds for some research expenses.
    - Single announcement with open eligibility

*You must be a citizen or non-citizen national of the United States, or must have been lawfully admitted to the United States for Permanent Residence*

# Grants that build your expertise...

## **Mentored awards (K-awards)**

- Most limited to individuals with clinical degrees
- Time sensitive when these are right for you career-wise
- Most have U.S. residency or citizenship requirements

## **K01, K08 & K23**

- Up to 5 years of mentored experience
- Support is primarily stipend support, but includes limited research support
- Must devote 75% or more of effort to research
- Limited to individuals with clinical degrees
- K01 limited to 3 topic areas at NICHD
- Talk to your PO early if you plan to apply!

# Grants that build your expertise...

- **K99/R00 – Pathway to Independence Award**
  - Open to individuals with terminal degrees in their program
  - Up to 2 years of mentored support
  - Up to 3 years of independent support for research ( $\leq$ \$249K/year - total costs)
- **Unique attributes**
  - The independent support is contingent upon securing a faculty/research position that is **INDEPENDENT**
  - No citizenship requirement
  - Great to have when going on the job market
  - **VERY** time sensitive on when this is strategically possible
    - Applicants can have **NO** more than 4 years of postdoctoral experience at time of application

# Research Project Grants

	R01	R03	R21	R15
Purpose	discrete, <b>specified</b> , circumscribed research projects	small research projects, including <b>pilot</b> and <b>feasibility</b> studies;  secondary analysis of existing data;  development of research methodology and new technology	<b>exploratory and developmental</b> research projects in early and conceptual stages;  some risk but may lead to breakthrough in field or other methods or technical developments	small research projects that expose <b>students</b> to research and strengthen the institution research environment;  <b>US institution that does not receive significant NIH funding</b>
Budget	as appropriate	\$50K/year(***)	Up to \$275K/entire	\$300/entire
Project Period	5 Years	2 years	2 years	3 years
Renewable	yes	no	no	yes
NI/ESI Status	yes	no	no	no
Foreign Inst		yes		no

# Grants that build your research...

- **R01** Research Project Grant Program
  - Up to 5 years, less than \$500K per year in direct costs
  - If direct is \$500K or over, you need to contact program official 6 weeks or MORE before application due date
  - [Early Stage Investigator Initiative](#)
  - <http://grants.nih.gov/grants/funding/r01.htm>
- **R21** Exploratory/Developmental Research Grant Award
  - Up to 2 years
  - Up to \$275K total direct costs over the course of the grant
  - <http://grants.nih.gov/grants/funding/r21.htm>

# Grants that build your research...

- **R15 Academic Research Enhancement Award**
  - Specific to institutions receiving no more than \$6 million per year in NIH support in each of 4 of the last 7 years
  - Up to 3 years of support available
  - Renewable!
  - Up to \$300K in direct costs over the course of the grant
  - Includes focus on inclusion of students in research
  - <http://grants.nih.gov/grants/funding/area.htm>
- **R03 Small Grant Program**
  - Up to 2 years
  - Generally \$50K/year direct but can vary by announcement
  - Not just for early career investigators (at least at the NICHD)
    - <http://grants.nih.gov/grants/funding/r03.htm>

# NIH and funding mechanisms

- There are 70+ mechanisms of support
- The examples provided are some of the most common
- Program staff can help you identify less common mechanisms that might be relevant given your specific circumstances(e.g., K25, R34)

# SO YOU IDENTIFIED A FUNDING MECHANISM ...WHAT NOW?

---

What's the process?

# Grant Writing

- This is different than writing for a journal
  - Prospective view
  - Big PICTURE is key
  - Make the case for the value of the science to the field (theoretical and practical import) and consideration of alternative outcomes
  - Why is this the best next step?

# Aspects of most grant applications

- Background and Significance
  - Need to tersely and cogently lay out the research questions or more generally aims of project
  - Need to portray an understanding of the scientific import of these questions from a broader theoretical and empirical viewpoint and connect to relevant literatures
  - Goals need to make sense given where we are in a particular field
    - This should set the stage for the formulation of your research design
  - Consideration of alternative views and vision for adapting if your predictions are wrong

# Design Issues

- Appropriately chosen given aims
  - Most rigorous design possible to answer the questions posed in your project
  - Be explicit here and tie to significant and innovation section for coherent narrative about your science
  - Yes, of course there are constraints but the onus is on you to argue that this is the best design choice in light of these constraints
    - \$\$\$, number of years, design limitations inherent in choice of setting
- Make sure you have appropriate human capital with appropriate expertise to complete project successfully

# General Grant Writing Comments

- Pay particular attention to how you pose and/or write:
  - Title, abstract, aims, examples, etc.
- Be explicit
- Think big picture but don't overstate import
- Revise, revise, revise!!!

# Review Process

- Application submitted by specific due date and reviewed some period later
- Reviewed by panel of scientific peers in the community
- Evaluated for scientific merit
  - Think significance, innovation, methods, expertise, and resources
- Funding based upon scientific merit, programmatic considerations, availability of funds
- The vast majority of people have to revise and resubmit before they are competitive for funding

# National Institutes of Health Grants Process At-A-Glance

## Planning, Writing, and Submitting

*Planning:* Applicant should start early, collect preliminary data, and determine internal deadlines.

*Writing:* Applicant often begins writing application several months prior to application due date

*Submitting:* Applicant organization submits most applications to NIH through the Federal portal, *Grants.gov*.

## Receipt and Referral

1 – 3 Months

Applications compliant with NIH policies are assigned for review by the Division of Receipt and Referral in the Center for Scientific Review (CSR).

CSR assigns application to an NIH Institute/Center (IC) and a Scientific Review Group (SRG).

Scientific Review Officer (SRO) assigns applications to reviewers and readers.

## Peer Review

4 – 8 Months

*Initial Level of Review:* SRG members review and evaluate applications for scientific merit.

*Priority Scores:* Available to Principal Investigator in eRA Commons.

*Summary Statement:* Available to Principal Investigator in eRA Commons.

*Second Level of Review:* Advisory council/board reviews applications.

## Award

9 – 10 Months

\*NIH Requests additional information needed *Just-In-Time* for award.

*Pre-Award Process:* IC grants management staff conducts final administrative review and negotiates award.\*

*Notification of Award:* Institute/Center issues and sends Notice of Award (NoA) to applicant institution/organization.

***Congratulations!***  
***Project period officially begins!***

## Post-Award Management

Administrative and fiscal monitoring, reporting, and compliance

Visit: [http://grants.nih.gov/grants/grants\\_process.htm](http://grants.nih.gov/grants/grants_process.htm)  
for more about the NIH grants process

# REVIEW CRITERIA

## 2 Level System for Application Review

### 1<sup>st</sup> Level

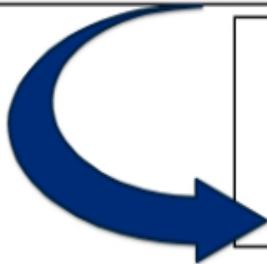

#### Scientific Review Group (SRG)

- Independent outside reviewers
- Evaluate scientific merit & significance
- Recommend length and level of funding

### 2<sup>nd</sup> Level

#### National Advisory Council

- Assesses Quality of SRG Review
- Makes Recommendation to Institute Staff on Funding
- *Evaluates Program Priorities and Relevance*
- *Advises on Policy*

# Review Criteria for Grant Mechanisms

<b>NRSA Fellowship Awards</b>	<b>Career Development Awards</b>	<b>Research Grants</b>
<b>Fellowship Applicant</b>	<b>Candidate</b>	<b>Investigator(s)</b>
<b>Sponsors, Collaborators, Consultants</b>	<b>Mentor(s), Co-Mentor(s), Consultant(s), Collaborator(s)</b>	<b>Innovation</b>
<b>Training Potential</b>	<b>Career Development Plan/Career Goals &amp; Objectives</b>	<b>Significance</b>
<b>Research Training Plan</b>	<b>Research Plan</b>	<b>Approach</b>
<b>Institutional Environment &amp; Commitment to Training</b>	<b>Environment &amp; Institutional Commitment</b>	<b>Environment</b>

# Initial Peer Review Criteria

---

**Overall Impact:** The likelihood for the project to exert a sustained, powerful influence on the research field(s) involved.

**Core Review Criteria:**

- **Significance:** Does the project address an important problem or a critical barrier to progress in the field? Will scientific knowledge, technical capability, and/or clinical practice be improved?
- **Investigator(s):** Are the PD/PIs, collaborators, and other researchers well suited to the project?
- **Innovation:** Does the application challenge and seek to shift current research or clinical practice paradigms by utilizing novel theoretical concepts, approaches or methodologies, instrumentation, or interventions?
- **Approach:** Are the overall strategy, methodology, and analyses well-reasoned and appropriate to accomplish the specific aims of the project?
- **Environment:** Are the institutional support, equipment and other physical resources available to the investigators adequate for the project proposed?

# Initial Peer Review Criteria

---

## ❏ **Overall Impact:**

- The likelihood for the project to exert a sustained, powerful influence on the research field(s) involved.

## ❏ **Key Points:**

- Overall Impact **takes into consideration**, but is distinct from, the scored review criteria.
- Overall Impact is **not the arithmetic mean** of the scores for the scored review criteria.
- Overall Impact is the **synthesis/integration** of the five core review criteria that are scored as well as applicable additional review criteria which are not scored.

# FUNDED PROJECTS

---

How to identify what's been funded

# Information on funded projects

- Information about ALL projects funded by NIH are available online to the public
  - Includes data on the most recent 10 years
- Includes some or all of the following:
  - Description of project (i.e., title, PI name, organization, abstract, key words, grant number)
  - Contact information for PI
  - Funding amount
  - Publications attributed to the grant
  - Searches available for 'similar' projects and ones funded nearby

# Star Metrics

## Federal RePorter

- Includes 11 federal agencies
  - ACF
  - AHRQ
  - CDC
  - DoD's CNRM & CDMRP
  - EPA
  - FDA
  - NASA
  - NSF
  - VA
  - USDA
  - NIH

The screenshot shows the STAR METRICS Federal RePORTER search interface. At the top, there is a navigation bar with links for HOME, SEARCH, ABOUT, PARTICIPATE, NEWS, and RESOURCES. The STAR METRICS logo is on the left, and utility links for FAQ, Contact, Help, LOGIN, and a printer icon are on the right. Below the navigation bar, the "Federal RePORTER" section is highlighted. A yellow banner at the top right of the search area promotes the new STAR METRICS ALPHA Federal RePORTER query form and includes a "SEND FEEDBACK" button. The main search area is divided into several sections: 1. "SUBMIT QUERY" and "CLEAR QUERY" buttons at the top. 2. "Fiscal Year (FY)" and "Agency" dropdown menus with "SELECT" buttons. 3. "RESEARCHER AND ORGANIZATION" section with fields for "Principal Investigator (PI) / Project Leader" (Last Name, First Name), "City", "State", "Country", "Congressional District", and "Organization" (with a "LOOK UP" button). It also includes radio buttons for search criteria: "Contains", "Begins with", and "Exact". 4. "TEXT SEARCH" section with a "Text Search (Logic)" field and radio buttons for "And", "Or", and "Advanced". It also has checkboxes for "Limit Project search to" with options for "Project Title", "Project Terms", and "Project Abstracts". 5. "PROJECT DETAILS" section with "Project Number" and "Project Start Date is after" (Format: mm/dd/yyyy) and "Project End Date is before" (Format: mm/dd/yyyy) fields. At the bottom, there are "SUBMIT QUERY" and "CLEAR QUERY" buttons.

# Thinking about searching for projects...

- Change perspectives and think like NIH
  - Focus on what you need and constrain search parameters
  - Constrain by some or all of the following if known...
    - Institute and Center
    - Program officer
    - Activity code (e.g., R01, R21) or Funding Mechanism (e.g., Training, Individual)
    - Fiscal year – e.g., active projects
- Text search
  - This will pull in more than you likely intend
  - You will also likely miss projects that use different terminology (e.g., “dyslexia” could miss work on reading disabilities)

## Take away

- Contact me as needed
- Contact me early if possible
- Keep focused on your long-term goals
